

Math Memes

Students will pick a math concept they have studied during the academic year and create a math meme in Google Slides and/or Google Drawings.

Materials

- Google Classroom
- [Link to Google Slides](#)
- [Link to Google Drawings](#)

Student Objectives

- Students will review key content from the math course for the academic year by creating a math meme

Teacher Technology Skills Needed

- Creating a Google Classroom
- Posting an Assignment to Google Classroom
- Sharing Resources via Google Classroom

Standards

- In this review activity students will cover content from all 6 modules of the New York Common Core Standards which include: Numbers, Geometry, Ratios and Proportions, Expressions and Equations, Statistics and Probabilities, and Functions.

Procedure

1. Post an Assignment to your Google Classroom in Classwork.
2. Students will follow directions in the Google Classroom to complete the activity.

3. Students will choose a math topic, or more than one topic they studied during the academic year and create a math meme in Google Slides or Google Drawing.

Extension Activity

- Students can have a class discussion via Google Classroom “Ask a question” and share what part they thought was the most difficult, what part might be most challenging to a new student, etc.
