

# Word Slide Blending Template

**Directions:** Use this template to help students sound out and blend the sounds of words. This can be printed out and laminated. It can be written on with dry erase marker or you can also use cubes, chips, or magnetic letters. Students then arrange letters in a consonant, vowel, consonant (CVC) pattern and slide their finger underneath each sound as they say it. This helps students keep sounds long, blended, and smooth just like sliding down the slide!
